## Industrial

### At the leading edge of technical development...

Elastacote is a leading manufacturer of resin based floor and wall coatings manufactured to industrial quality standards.

Elastacote has formulated a range of products using epoxy, polyurethane and polyurea, resin systems. These include solvent free, water based, non-tainting, high impact, wear, slip, chemical and corrosion resistant systems.

In industrial environments the choice of coating is critical flooring is very often subjected to high wear and tear and chemical damage. Selection of the correct product is often complex depending on many factors including current and anticipated use.

Specifications vary from thin film coatings and sealers through high build coatings, self smoothing coatings, screeds and heavy duty trowelled systems. Products are used individually or in combination depending upon the situation and performance requirements of the flooring.

Elastacote offers a complete range of solutions for the industrial environment. We pride ourselves on a high level of customer service and technical support.
